INFORMATION

(Includes course manual, snacks in the morning and afternoon)

- A non-refundable minimum in the course.
- Full tuition is due no later than **one** month prior to the course start date.
- If registrant cancels prior to the course, a non-refundable \$300 will be charged and the balance of the paid tuition will be refunded.
- Canceling or being absent on the **first day** of the course regardless of reason is considered an automatic cancellation, tuition is forfeited and there is no refund - **no exceptions.**

A 4-day intensive tutorial in the diagnostic and therapeutic application of *animal normalization techniques* as applied to the cranial, cervical spine and lumbar pelvis area of the canine/feline.

These techniques use the principles of motion testing, inherent tissue motion and motion in relation to the restrictive barrier. Lecture, demonstration and hands-on applied practice of the techniques for the various regions will be given. Emphasis will be placed on palpatory skills.

This tutorial addresses evaluation of:

- Spinal mechanics & Atlas-Axial joint mechanics
- Understanding the diaphragm mechanics and impact
- Fascial line techniques plus diaphragm
- Autonomic Nervous System
- Sequencing principles
- Neuro Integrational Patterns (NIP) - gait analysis
- Class available for Veterinarians, Vet. Technicians, Physical Therapists, and other health care providers

Approved by Oregon and Washington Veterinary Licensing Board for CEU's.
