INFORMATION

(Includes course manual, snacks in the morning and afternoon)

- A **non-refundable** minimum \$300 deposit is required to reserve a space in the course.
- Full tuition is due no later than **one** month prior to the course start date.
- If registrant cancels prior to the course, a non-refundable \$300 will be charged and the balance tuition refunded.
- Canceling or being absent on the **first day** of the course regardless of reason is considered an automatic cancellation, tuition is forfeited and there is no refund.

A 4-day intensive tutorial in the diagnostic and therapeutic application of *Animal Normalization Techniques (ANT)* as applied to the cranial, cervical spine and lumbar pelvis area of the canine/feline.

These techniques use the principles of motion testing, inherent tissue motion and motion in relation to the restrictive barrier. Lecture, demonstration and hands-on applied practice of the techniques for the various regions will be given. Emphasis will be placed on palpation and manual skills.

This tutorial addresses evaluation of:

- Principles of osteopathy
- Beginning lymphatics and vascular techniques
- Sacral mechanics and gait analysis
- Shock, lymph stagnation and gluten impaction
- Beginning spinal and sacral mechanics, lumbo-pelvis dynamics
- Osteophonics and use of tuning forks
- Beginning fascial line techniques
- Class available for veterinarians, veterinary technicians, physical therapists and other health care providers

Approved by Oregon and Washington Veterinary Licensing Board for 30 hours of CEU's.
